# WEB DEVELOPMENT SOLUTIONS

## WHO WE ARE

Good business is about reliability, productivity and performance. Since 1982, MBS has been partnered with businesses in central California to provide workplace solutions.

We have built a solid reputation as a growth partner and service provider for growing small and medium sized businesses.

Our MBit IT Managed division now offers expert web development options for our customers. As your trusted business technology resource, we provide advanced website design services.

If you have been considering a redesign of your website, start with MBit IT Managed web development solutions.

Your business website is the most valuable asset for growth, sales conversion and customer recruitment.

Our team at MBit IT Managed provides a comprehensive web development package that includes legacy design, for a website that will continue to grow with your business.

Optimize workflow with our web development solutions and automations, custom built for your business.

Learn more about secure document management systems, sales and marketing processes that can be integrated for seamless regional or national growth, with our turn-key website design packages.

We build High Performance

# WEBSITES

## Your website has to do more than 'look good' to help your business grow.

We craft websites in accordance with the latest design trends, customized to the unique culture of your brand. Working one-on-one with our web development team, we will help you communicate the core values of the products and services you offer to your customers.

### UI / UX

Responsive design providing high-speed website usability on any portable device.

### SEO

Comprehensive search optimization and custom code developed into your website to enhance search results.

### CONTENT

From optimized landing page copy, to blog content written to help your new website rank on major search engines.

## What is a legacy website build?

Your business needs will change over time, as you grow and expand into new products, services and markets. Wouldn't it be nice if your website could grow with your business? Our MBit IT Managed team provides a dynamic, responsive and custom designed theme with limitless web development options and functionality. A high performance website that will grow with you.
